SUMMARY

I am a student at the age of 17, currently studying web development in extra class SMK (senior high), year 3. My passion is coding, I already developed a few websites using Next.Js, React Js, Typescript Js & Tailwind CSS in multiple projects. A junior web developer by profession, a learner who follows the trends and technology based on today's needs in Human computer interaction. I am a team player and very good in communication skills, which helps me to work together with people.
